Bromic is globally recognized as the leader in outdoor heating.

**Platinum Electric
Marine**

Marine 3400W
Series Heater

Sleek, *Seamless*, & Modern.

The ultimate in seamless slim-line outdoor heater design.

The award-winning Platinum Smart-Heat collection is specifically suited to beautifully integrate into design-focused spaces. Available with gas or electric fuel sources, black or white finishes, and a wide array of ceiling, wall, and flush-mounting options, the Platinum collection's low form factor is designed to offer a full-range solution to incorporate radiant heating into any space.

Looking for a heater that offers the most effective heating technology, sleek and modern design, and minimal light emission? You've found it.

Platinum Electric
3400W Series Heater

Design + Integration

Platinum Smart-Heat outdoor heaters are the perfect balance of performance, reliability, and beauty. We use tinted ceramic glass to seal the heater components from the elements, stainless steel to ensure the chassis stands the test of time, and have perfectly engineered the heater to virtually disappear into its surroundings. The competition doesn't even come close.

Platinum Electric

Unequivocally, the best recessed heater in the market. Made of durable 304 stainless-steel, and available in both black and white with three heat outputs and sizes (2300W, 3400W and 4500W), this slim-line premium heater was specifically designed for perfect architectural integration into any space.

Platinum Electric Marine

Made of high-quality, AISI316 stainless-steel, Bromic Platinum Smart-Heat™ Electric Marine heaters were specifically engineered to provide superior resistance to the corrosive elements of coastal and marine environments.

Platinum Gas

The signature black ceramic surface of the Bromic Platinum Smart-Heat™ Gas series projects radiant heat deep into your outdoor area (up to 215ft²) and successfully overcomes winds of up to 12mph. Available in both natural gas and propane fuel sources, this series provides optimal coverage for higher ceilings and colder climates.

Selecting Your Fuel Source

As the only manufacturer that offers outdoor heating solutions in natural gas, propane, and electric fuel sources, the fuel selection criteria can offer important advantages in your specific application. Here are three areas to consider in your design plan.

1

Climate

The physical location and placement of your heaters can leverage significant efficiency based on the fuel type.

PLATINUM ELECTRIC

- Ideal for enclosed and semi-enclosed applications.
- Its environmentally sealed design protects from wind and offers superior longevity.

PLATINUM ELECTRIC MARINE

- The most advanced heater available to protect from the corrosive exposure of marine and coastal applications.

PLATINUM GAS

- Ideal for colder environments with high ceilings and big power requirements.
- Requires ventilation, is more susceptible to wind and is not dimmable.

2

Clearances

How you integrate your heaters into your space is largely dictated by the clearances each fuel source requires. No matter the fuel source, a minimum mounting height of 96" is required in clearance from the floor to the bottom surface of the heating solution.

PLATINUM ELECTRIC

- Standard and Low Clearance Recess Kits available for flush-mount installation.

PLATINUM ELECTRIC MARINE

- Standard and Low Clearance Recess Kits available for flush-mount installation.

PLATINUM GAS

- Requires 14" of ceiling clearance with optional heat reflector, 36" of vertical clearance without reflector.

3

Cost

Operational fuel costs can have a significant impact on high use applications like Restaurants and Hospitality. Fuel costs can vary by locale.

PLATINUM ELECTRIC

- ±\$1.84 per hour to heat a 400ft² patio

PLATINUM ELECTRIC MARINE

- ±\$1.84 per hour to heat 400ft² patio

PLATINUM GAS

- ±\$1.06 per hour to heat 400 ft² patio

Platinum Smart-Heat Electric

Available in black and white, our Platinum Smart-Heat Electric heater is specifically suited for low-clearance and design-focused spaces. With its low-form, environmentally sealed, high-quality 304 stainless steel chassis and tinted ceramic-glass screens, this heater spreads comfort evenly, all while minimizing light emissions. This durable, award-winning design virtually disappears into its surroundings, blending seamlessly into the background with our recessed mounting solutions.

Performance, Reliability & *Beauty*

Bromic outdoor heaters are recognized all over the world for superior design and performance. From luxury hotels and leading restaurants to distinguished residential outdoor kitchens and exquisite backyards, Bromic outdoor heaters deliver the comfort and ambiance needed to elevate the outdoors.

Available in our distinctive collections, every Bromic outdoor heater is constructed from premium materials to deliver outdoor heating products that provide the perfect balance of performance, reliability and beauty.

Sustainability

The environment has a heating partner.

Bromic is committed to utilizing sustainable design principles. Leveraging outdoor spaces for dining, working, and congregating is a design priority for leading architects around the world and the global pandemic has taught us that outdoor spaces are some of the safest, healthiest, and most necessary elements in both residential and commercial contexts.

The tenants of sustainability are to reduce consumption of non-renewable resources, minimize waste, and create healthy, productive environments.

SUSTAINABLE DESIGN PRINCIPLES INCLUDE THE ABILITY TO:

- Optimize site potential
- Enhance indoor environmental quality
- Minimize non-renewable energy consumption
- Optimize operational and maintenance practices
- Use environmentally preferable products

Utilizing a sustainable design philosophy encourages decisions at each phase of the design process that will reduce negative impacts on the environment and the health of the occupants, without compromising the bottom line.

We continue our commitment to building increasingly efficient outdoor heaters that don't waste energy by heating the air, but rather, heating people with radiant technology. While many competitors' heaters may last only a season or two, Bromic heaters continue to provide warmth and comfort year-after-year, even in commercial environments.

Explore our collection lineup

Eclipse

Available in seven unique mounting options, including portable, the Eclipse Smart-Heat™ Electric collection adds style, warmth and light to design-focused outdoor spaces.

Platinum

With both gas and electric models to choose from, the Platinum Smart-Heat™ collection features premium ceramic glass fascias and stainless-steel frames for a sleek and timeless look.

Tungsten

Our Tungsten Smart-Heat™ gas and electric outdoor heaters come in a stylish, industrial design with a wide selection of heat output and mounting options, including portable.

★★★★★

Very easy to install and it probably is the best looking NG heater I have seen.

BROMIC HEATING

Recommended Heating Solution

For your area, we recommend the **PLATINUM SMART-HEAT™ ELECTRIC 2300/3400W/4500W BLACK/WHITE**

PRODUCT OVERVIEW

Installation: Heaters to be mounted between 2400-2700mm above finished floor to optimise heat output. Heaters can be angled at 28 degrees (either side) with the provided mounting bracket.

Dimensions: 2400W (WxDxH) 840 x 182 x 54mm / 3400W (WxDxH) 1275 x 182 x 54mm / 4500W (WxDxH) 1351 x 257 x 54mm

Consumption: Platinum Electric heaters are available for use with 220/240V. The heaters use a ceramic glass front and unique element technology to produce a more efficient heater.

- Each 2300W heater pulls 9.6Amps (on 220/240V)
- Each 3400W heater pulls 14.2Amps (on 220/240V)
- Each 4500W heater pulls 18.8Amps (on 220/240V)

Controls: Each heater needs its own controller, of which we offer two options:

- **Option 1:** Dimmer Control provides full incremental heat output (from 100%-0%) with remote control buttons pre-set at 100%, 75%, 50%, 25%. One 42-Channel Master Remote can be used to control all heaters from one single location.
- **Option 2:** On/off Control – controls two heaters in an on/off mode.
- Alternatively, heaters can be hard-wired to a wall switch.
