### LAVA ROCK ONLY

When using lava rock, use enough to cover entire burner. Do not over-fill. Just use enough to hide the burner from view.

### LAVA ROCK & GLASS

In order to use glass, you must lay down a layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your glass and lay it on top of the lava rock and burner. The glass should only be 3/4" to 1" thick, or just enough to cover the burner.

### LAVA ROCK & LAVA STONES

In order to use lava stones, you must lay down a layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your lava stones and lay it on top of the lava rock and burner. The lava stones should only be one layer thick, just enough to cover the burner.

### LAVA ROCK & LAVA BOULDERS

In order to use lava boulders, you must lay down a bottom layer of lava rock. Fill the pan with lava rock until it is level with the top of the burner. Then take your lava boulders and lay it on top of the lava rock and burner. Lava boulders are 6" to 12" in diameter.
