

4. Connect Smart Speakers

Google Home

1. Open the Google Home app, press add, and the set-up device.
2. Click on “Works with Google”.
3. Search for IntelliFire and then press on “have something already set up”.
4. You will be asked to enter your IntelliFire app email and password to complete the set up.

Amazon Alexa

1. Open the Amazon Alexa app; click on the “More” tab, under Skills & Games search for ‘IntelliFire’.
2. Select IntelliFire and press enable to use.
3. You will be asked to enter your IntelliFire app email and password to complete the set up.

Additional Support

Scan me with your smart phone for the full User Guide.

Scan me with your smart phone for IntelliFire app Setup and Help Videos.

1. Get the IntelliFire App

Create a new IntelliFire account, and log in.

2. Connect your Fireplace

Follow the onscreen prompts to add your location and connect to the Intellifire_XXXX network via Wi-Fi.

An audible beep will confirm you have connected to the device.

3. Connect your Wi-Fi

Following the prompts, connect your home Wi-Fi network and name the appliance.

A second audible beep confirms your fireplace is connected to your home network and the cloud.
