

Aluminum Wall Plate & Black Knob Included

Heavy Duty Timers

OVERVIEW

Proudly manufactured in the USA, the MarkTime® 70AB Series Heavy Duty Timers are engineered for demanding electrical loads and are the most robust in-wall time switches in the industry, offering a 28 Amp rating.

APPLICATIONS

The MarkTime® 70AB Series Heavy Duty Timer can be used in a variety of residential and commercial applications, providing convenient timed control of saunas, jacuzzi's and pools, heavy duty blower control, track lighting, industrial machinery, and other circuits requiring 28 Amp loads. The brushed aluminum wall plate and black knob are perfect for commercial environments.

FEATURES & BENEFITS

- Supplied with knob, brushed aluminum dial, and wall plate.
- Fits double-gang wall box and replaces a single-pole or double-pole wall switch for fast, easy installation.
- Proudly manufactured in the USA.
