### Important Tiki Pole Information

**Faux Bamboo Pole**

**Description:** 10 foot pole, made from Schedule 40 PVC. Joints created with heat to simulate a “raised” texture. Pole is air brushed to look like bamboo, then sealed with a UV sealer to protect from fading.

**NOTE:** Faux bamboo pole DOES NOT come with a base pole that can be installed into the ground for support. When using bamboo pole, the gas line inside the pole is the support for the entire assembly.

**Aluminum Powder Coated Pole**

**Description:** 7 foot aluminum tubing pole, powder coated in Black. Excellent resistance to corrosion that may occur from the weather and outdoor elements.

**NOTE:** Aluminum pole DOES come with a base pole that is installed into the ground for support. See tiki torch instruction manual for more details.
