FIRE FEATURES...**REIMAGINED**

**2022/
2023**

From Flying to Fire... From Fire to Water...

Taming the flame, that's our passion at Fire by Design. Born with a need to create better (in every way!) fire feature systems for commercial and residential use, we founded a company to reimagine the products and applications needed to create special environments and unforgettable experiences. Discover our unique fire pits, fire bowls, tiki torches, and more.

I spent the first 20 years of my post college life flying airplanes. I began by flying fighters in the military followed by a 13-year stint as a commercial airline pilot. Though flying airplanes was fun, it felt like something was missing. As a child I loved to build and create things; however, as a pilot, I did not build or create anything. After 9/11, my career as a pilot changed drastically for the worse. I was unhappy with the job and ultimately decided it was time that I left to pursue my other passion which was to create things. Little did I know that only a few short years later, I would develop an electronic ignition system that would transform an industry. Imagine...a system that also makes fire ON water possible!

Please enjoy this brief history of our company and our team. This catalog outlines our most popular components. Questions are common, but our approach is not: We love to talk with our customers to answer questions and ensure they're ordering what they truly need and want. From pre-order to installation questions and product support, our team is here to assist. Discover why we engineer and build products enjoyed not only across the U.S., but also across the world.

our story

HAVE A SPECIAL NEED?

Custom projects are our specialty! If you envision creating a particular outdoor experience, but don't see what you need, call us. Many of our innovative product solutions and applications were created because someone had a question or idea, but no answer or solution. We thrive on being your creative resource. It begins with a call to our team.

FROM MATCH-LIT FIRE TO AUTOMATED FIRE...

In the early days of building fire pits and fireplaces, all the features were lit by hand. The customer would turn on the gas by way of a manually operated gas valve and then ignite the flame using a log lighter or similar device. One day an owner of a local bar contacted Bob asking about installing a fire feature on top of the sign in front of his bar. He wanted to be able to turn the fire on by way of a remote control and/or a timer. Not the type to ever say "No," Bob began researching the different options for controlling fire by way of a remote control. This led to his introduction to electronic ignition systems which are commonly found in furnaces, hot water heaters and boilers.

His first attempt at automating this fire feature involved using a gas valve and a controller typically found inside a furnace. This makeshift system operated flawlessly inside his shop; however, when installed on top of the sign, it behaved erratically, and on windy days it would not operate at all. Simply put the system was not designed for outdoor use. Troubleshooting that installation led Bob to the idea of developing a system that was truly designed "For Outdoor Use."

THE ALL WEATHER ELECTRONIC IGNITION SYSTEM BECOMES A REALITY...

In Fall 2009, Bob met with a local engineer adept at designing circuit boards and writing the code for the boards. Eight months later after a considerable investment in time, money, and effort, the All Weather Electronic Ignition System (AWEIS) was born. Though the original AWEIS was an excellent system, we have continued to refine and improve it. We are proud to say the AWEIS is considered the "Gold Standard" when compared to other systems on the market today and we remain committed to ongoing improvements to maximize customer satisfaction.

**"Setting industry standards in equipment quality and design.
Customer satisfaction beyond expectations."**

DISCLAIMER

Fire by Design made every effort to ensure the product details and specifications within this catalog were correct at the time of printing. However, with ongoing product additions and enhancements, specifications are subject to change without notice. Please confirm any critical details/specifications for your application when you inquire or place an order with our team. Thank you.

“The outdoor fire feature industry has grown leaps and bounds over the past 10 years and in my opinion there are no better automated ignition products available. Reliable, simple to install and unmatched performance.”

*-Bryan Cline
Owner | Outdoor Fire Designs*

24 VAC AWEIS

Field Serviceable Commercial Grade AWEIS collection

All 24 VAC Systems Include a 24 Volt AC Transformer, Commercial Grade Pilot Burner Assembly (CGPBA) (the XHC Comes with (2) 18" CGPBA), Ignition Control Module, Heat Deflector Shield and Install Instructions. Standard Available Pilot Burner Sizes - 12"/18"/24"/30" - Extensions Available for Longer Lengths.

Model No.	Description
SCGNG / SCGLP	Field Serviceable AWEIS Standard Capacity with 12" CGPBA / Natural Gas or Liquid Propane. (Inlet Size: 1/2" FIP; Outlet Size: 1/2" FIP) 290K BTU. Control Box Dimensions: 4 1/2" x 5" x 4 1/2" (W x L x H)
HCGNG / HCGLP	Field Serviceable AWEIS High Capacity with 18" CGPBA / Natural Gas or Liquid Propane. (Inlet Size: 3/4" FIP; Outlet Size: 3/4" FIP) 510K BTU. Control Box Dimensions: 4 1/2" x 5 1/4" x 5 1/2" (W x L x H)
XHCNG / XHCLP	Field Serviceable AWEIS Extra High Capacity with (2) 18" CGPBA Configuration / Natural Gas or Liquid Propane. Includes 75VA / 24 Volt AC Transformer. (Inlet Size: 1" FIP; Outlet Size: 1" FIP) - 1.1 Million BTU. Control Box Dimensions: 7 9/16" x 7 7/16" x 8" (W x L x H)

30 VDC AWEIS

All 30 VDC Systems Include a Commercial Grade Pilot Burner Assembly (CGPBA) (the XHC Model Comes with (2) 18" CGPBA), Ignition Control Module, Heat Deflector Shield and Install Instructions. Standard Available Pilot Burner Sizes - 12"/18"/24"/30" - Extensions Available for Longer Lengths. FOR USE ON FIRE FEATURES WITHIN 5' OF A SWIMMING POOL.

Model No.	Description
SCGNG30 / SCGLP30	Field Serviceable 30 VDC AWEIS Standard Capacity Commercial Grade with 12" CGPBA / Natural Gas or Liquid Propane. (Inlet Size: 1/2" FIP; Outlet Size: 1/2" FIP) DOES NOT Include Power Supply - Sold Separately - 290K BTU. Control Box Dimensions: 4 1/2" x 5" x 4 1/2" (W x L x H)
HCGNG30 / HCGLP30	Field Serviceable 30 VDC AWEIS Commercial Grade High Capacity with 18" CGPBA / Natural Gas or Liquid Propane. (Inlet Size: 3/4" FIP; Outlet Size: 3/4" FIP) DOES NOT Include Power Supply - Sold Separately - 510K BTU. Control Box Dimensions: 4 1/2" x 5 1/4" x 5 1/2" (W x L x H)
XHCNG30 / XHCLP30	Note: The XHC AWEIS is NOT offered in a 30 VDC Version

Battery Powered All Weather Electronic Ignition System (BPAWEIS)

The Battery Powered Electronic Ignition System was developed for use in portable Fire Pits and Fire Tables. With this system and a portable LP gas tank, you no longer need to invest in expensive gas lines and electrical wiring. After installed, a simple flip of a switch and your fire feature will ignite itself, monitor the flame and relight itself if ever the flame goes out.

The Battery Powered Electronic Ignition System includes the following:

- | Ignition Control Box
- | Pilot Burner Assembly (Spark Ignition)
- | Waterproof Battery Pack (3 AA Batteries)
- | Rocker Switch
- | LED Indicator Light
- | Face Plate (Rocker Switch, LED and Key Valve mounted to Face Plate)

submersible electronic ignition system

(SUBEIS)

The Submersible Electronic Ignition System (SUBEIS) is the first-ever electronic ignition system designed for use with fire features that are submerged in the water.

Combined with a submersible manifold, this creates fire literally ON the water.

24 VAC SUBEIS

All 24 VAC Systems Include a 24 Volt AC Transformer, Fire on Water Pilot Burner Assembly (FOWPBA), Ignition Control Module and Install Instructions. Available in Natural Gas or Liquid Propane.

Model No.	Description
SSCGNG / SSCGLP	SUBEIS Standard Capacity Commercial Grade (Inlet Size: 1/2" FIP; Outlet Size: 1/2" FIP)
SHCGNG / SHCGLP	SUBEIS High Capacity Commercial Grade (Inlet Size: 3/4" FIP; Outlet Size: 3/4" FIP)

30 VDC SUBEIS

All 30 VDC Systems Include a Fire on Water Pilot Burner Assembly, Ignition Control Module and Install Instructions. Available in Natural Gas or Liquid Propane. 30 VDC Power Supply Sold Separately.

Model No.	Description
SSCGNG30 / SSCGLP30	30 VDC SUBEIS Standard Capacity Commercial Grade (Inlet Size: 1/2" FIP; Outlet Size: 1/2" FIP) DOES NOT Include Power Supply - Sold Separately
SHCGNG30 / SHCGLP30	30 VDC SUBEIS High Capacity Commercial Grade (Inlet Size: 3/4" FIP; Outlet Size: 3/4" FIP) DOES NOT Include Power Supply - Sold Separately

vulcan fire module (VFM)

24 VAC VFM

All 24 VAC Systems Include a 24 Volt AC Transformer and Install Instructions.
(Standard Inlet Size: 1/2" FIP / Other Inlet Sizes Available) - 25K BTU.

Model No.	Description
VFMCNG / VFMCGLP	Commercial Grade Vulcan Fire Module / Natural Gas or Liquid Propane
VFMBNG / VFMBLP	Vulcan Fire Module with Burst Feature / Natural Gas or Liquid Propane
VFMNNG / VFMLP	Original Vulcan Fire Module / Natural Gas or Liquid Propane

30 VDC VFM

All 30 VDC Systems Include Install Instructions. (Standard Inlet Size: 1/2"
FIP / Other Inlet Sizes Available) - 25K BTU. 30 VDC Power Supply Sold Separately.

Model No.	Description
VFMCNG30 / VFMCGLP30	Commercial Grade Vulcan Fire Module / Natural Gas or Liquid Propane
VFMBNG30 / VFMBLP30	Vulcan Fire Module with Burst Feature / Natural Gas or Liquid Propane
VFMNNG30 / VFMLP30	Original Vulcan Fire Module / Natural Gas or Liquid Propane

A photograph of a modern outdoor pool area at night. The pool is illuminated with blue lights, and a fire pit with a long, low fire is in the foreground. There are several lounge chairs with red cushions around the pool. In the background, there are palm trees and a house with a tiled roof. The sky is dark blue.
