

# RECOMMENDED CARE FOR STEEL MANTEL SHELVES

## HOW TO CLEAN YOUR STEEL MANTEL SHELF

Our steel mantel shelves are made from high quality material that needs special care to avoid damage. We do not recommend using household cleaning products, as the chemicals and ingredients can sometimes be harsh or abrasive, and may scratch or tarnish the finish. The only exception to this rule would be if you have a stainless steel mantel shelf with a brushed or natural finish - in this case you may use a quality stainless steel cleaner in combination with a soft cloth to clean the surfaces. Otherwise, you can follow the instructions in this care manual.

### Gather the following supplies:

- 2 small buckets
- 3 clean, soft cloths (such as microfiber)
- Mild detergent or soap
- Warm water

Fill the first bucket with warm water. Add a few drops of mild detergent or soap. Soak one microfiber cloth in the soap mixture and then use it to clean all surfaces of your steel mantel shelf. Fill the second bucket with clean warm water and soak a separate cloth in it. Use the clean cloth to rinse/wipe down the surfaces of your mantel. With the third microfiber cloth, dry and buff the surfaces of your shelf.
