

FIREPLACE MANTEL MEDIA CENTER FURNITURE STYLE MEASUREMENT GUIDE

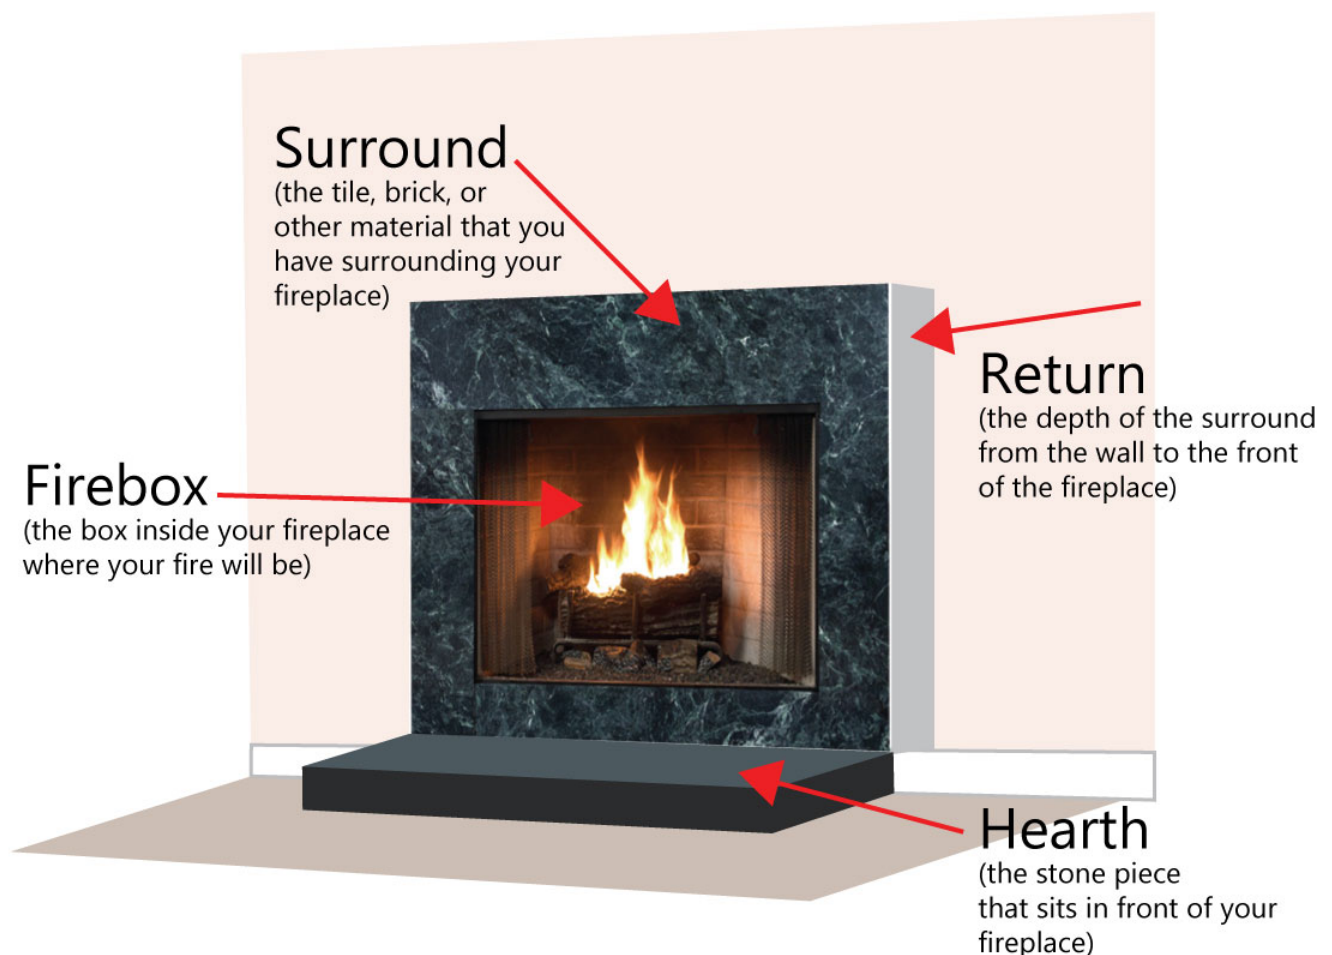

To figure out what size mantel you'll need, we'll first need measurements of your current fireplace, surround, and hearth.

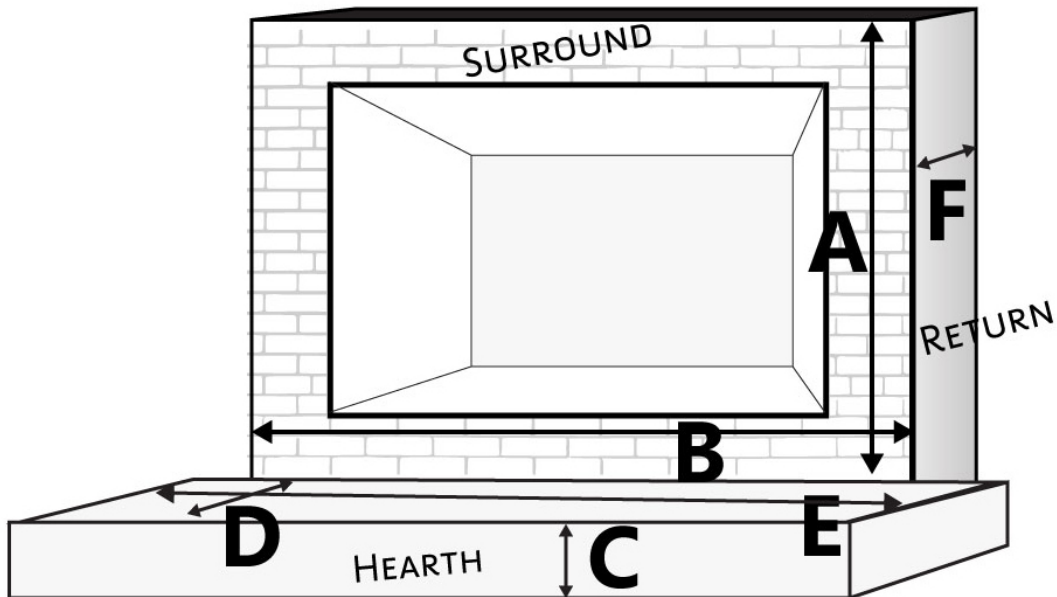

We've included some diagrams and some explanations of what the different parts of the fireplace are that we'll be talking about.

Important terms to know when measuring
for your fireplace mantel.

Section 1:

A: Height of Surround in Inches: _____
 (Remember the surround is any type of material that surrounds the facing of your fireplace).

B: Width of Surround in Inches: _____

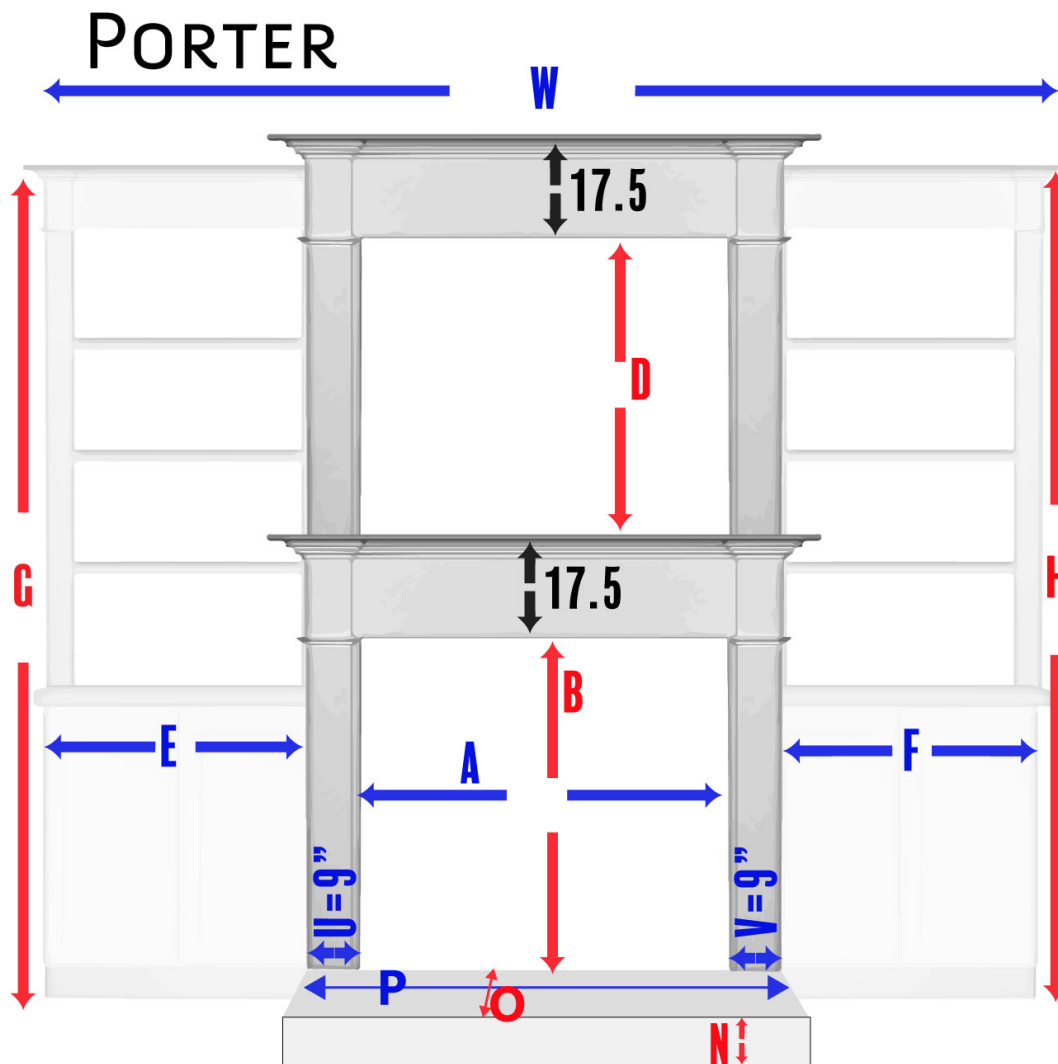

C: Height of Hearth in Inches: _____
 (If you do not have a hearth of any kind, please note that here).

D: Depth of Hearth in Inches: _____
 (From the front of the hearth to where it meets your fireplace).

E: Width of Hearth in Inches: _____
 (Many times the hearth is longer than the fireplace and surround).

F: Depth of Return in Inches: _____
 (The depth of the surround from the front or fascia, to where it meets the wall).

Section 2:

A: Inside Mantel Width: _____

Width in inches from inside of mantel leg to inside of mantel leg.

B: Inside Mantel Height: _____

Height in inches from floor (or hearth) to inside of mantel shelf.

E: Left Cabinet Width: _____

Width you'd like your left cabinet to be - from the outer edge of the mantel.

F: Right Cabinet Width: _____

Width you'd like your right cabinet to be - from the outer edge of the mantel.

G: Left Floor To Ceiling Height: _____

Height in inches from floor to ceiling at the furthest left area where cabinet will be.

H: Right Floor To Ceiling Height: _____

Height in inches from floor to ceiling at the furthest right area where cabinet will be.
